where you will get pictures as beautiful as this!

Relevant events

In May 2019, POLA-01, POLA-02, POLA-03 detectors will be moved to and then installed in the scientific base in Ny Alesund, managed by the RIS – Research in Svalbard.

Updates on the different steps will be given on our social networks.

A *live* event is being planned for the official starting of the project on May 30°, 2019.

Updates on the details will be circulated through our social networks during next weeks.

Stay tuned!
