

Misura dell'orientazione: stato

- 34 telescopes have completed (and communicated) the measurements
- ~16 still missing
- Torino area expected for the end of April
- Salerno schools are trying to repeat the measurements with the projective methods
- From the Roma/Frascati area only FRAS-01 completed the measure.
- Too many schools make use of magnetic procedure
- Only ~1/3 of the schools which completed the measurements have prepared a detailed report on the measurements.
