

MUSEO STORICO DELLA FISICA

CENTRO STUDI E RICERCHE ENRICO FERMI

## GIORNATE DI STUDIO CENTRO FERMI ROME, 8-9 MARCH 2018

## CENTRO FERMI'S PROJECTS 2018-2019

LUISA CIFARELLI — Centro Fermi, Rome (IT) European & Italian Physical Society University & INFN, Bologna (IT) — CERN, Geneva (CH)

> ROSARIO NANIA – Centro Fermi, Rome (IT) INFN Bologna (IT)

**CENTRO FERMI** is a research institution created in 2001 devoted to interdisciplinary studies and to dissemination of scientific culture

 $\rightarrow$  dual mission

It aims to integrate the knowledge generated in different fields, and to promote discussion among top scientists with different areas of expertise, in order to create what **Enrico Fermi** would have liked to establish in Italy:

a centre dedicated to frontier research in physics and to its wide applications for the benefit of humankind.

NEW STATUTE APPROVED in august 2017

President: Luisa Cifarelli

Administration Board: Carla Andreani, Giovanni Batignani Director General: Cinzia Santarelli Coordinator of Strategic Projects: Rosario Nania

Scientific Council (CS): William Barletta, Angela Bracco, Pierluigi Campana, Eugenio Coccia, Joseph Niemela

Internal Evaluation Committee (CIV): Silvia Dalla Torre, Sergio Ferrara, Angiolino Stella

Staff: Emanuele Mastrangeli, Alessandro Orlandi (\*), Marta Pepe, Francesca Salvatore (\*), Emanuele Vella

Research & Technology Staff (\*): Fabrizio Coccetti, Daniele De Gruttola, Giulia Festa, Francesco Sylos Labini

+ Grantees & TD Researchers (\*\*) & Associate Researchers (\*\*\*)

(\*\*) TD: "Tempo Determinato", i.e. Non Permanent Staff

(\*\*\*) Belonging to other Institutions

<sup>(\*)</sup> TI: "Tempo Indeterminato", i.e. Permanent Staff

The activities of **CENTRO FERMI** characterize its uniqueness:

- 1. Grants, for "New Talents" and Senior/Junior researchers, to study original and interdisciplinary research topics;
- 2. Research Projects, including those defined as Strategic Projects, for the realization and promotion of <u>interdisciplinary</u> original research;
- 3. Activities for the Dissemination of Scientific Culture and Historic Memory, through the restoration of the "Monumental Complex" of Via Panisperna, the old Institute of Physics which has an extraordinary historical value, to be used in part for the Museum.

- CENTRO FERMI Grants Fermi Grants (scholarships, research grants and collaboration assignments) are competitive with European scholarships for prestige and sometimes for amount.
- About **370** <u>annual</u> Fermi Grants have been awarded since 2002 (renewals or new contracts).
- Candidates are selected by public calls.
- A Fermi Grant award is typically appointed for one year period (renewable up to 2 times , according to Italian rules).
- Most of the Fermi Grant awards have won competitions for prestigious (permanent) positions in Universities or Research Institutes in Italy or abroad.

#### LINEE DI RICERCA

1	Extreme Energy Events (EEE) – La Scienza nelle Scuole
2	Tecniche Avanzate per la Fisica Fondamentale
3	Tecniche Avanzate per Applicazioni Biomediche
4	Energia
5	Ambiente e Patrimonio Culturale
6	Storia della Fisica
7	Attività Museali e laboratori

#### **PROGETTI INDIVIDUALI**

- Strutture Gravitazionali e Complesse (F. Sylos Labini)
- A Geometrical Approach to Quantum Gravity
- Hawking Radiation and Backreaction
- Modellizzazione dell'Emissione di Onde Gravitazionali da Sistemi Binari Coalescenti
- Cosmological Radiative Transfer in Early Structure (CORTES)
- BioTarget : Radiazioni Ionizzanti e Effetti su Nuovi Target Biologici
- The Double Copy Paradigm: Gauge^2 = Gravity ? [\*]
- High Spins and their Symmetries [\*]

[\*] Selection under way

Progetti Interdisciplinari	
1. Extreme Energy Events – La Scienza nelle Scuole	
PROGETTO STRATEGICO	EEE
1. Tecniche Avanzate per la Fisica Fondamentale	
2-1. Quark-Gluon Coloured World – ALICE and beyond	QGCW
2-2. Problematiche Aperte della Meccanica Quantistica	PAMQ
2-3. Fisica Fondamentale nello Spazio	FISP
2-4. Microcavità Fotoniche	MIFO
2-5. Innovative Mirror Coating Research	ICORE
3. Tecniche Avanzate per Applicazioni Biomediche	
3-1. Tecnologie per le Neuroscienze	TNEU
3-1.1 Tecniche di Risonanza Magnetica Funzionale del Cervello	<b>T-MENS</b>
3-1.2 Piattaforma per l'Analisi Multimediale Integrata in Neuroscienze Applicate	PAMINA
3-1.3 Risonanza Magnetica per lo Studio delle Microlesioni del Cervello	<b>MICROBRADAM</b>
2. Tecnologie per l'Adroterapia	TADR
3-2.1 Imaging Dosimetrico per Adroterapia	IMDO
3-2.2 Monitor for Neutron Dose in Hadrontherapy	MONDO
2. Microcircuiti Neuronali Locali	MNL
4. Energia	
1. Fotovoltaico a Concentrazione	CPV
2. Sistemi Intrinsecamente Sicuri – Accelerator Driven Systems for Research on Nuclear	SIS
Technology	
5. Ambiente e Patrimonio Culturale	
1. Sistemi Diagnostici per Tomografia Tridimensionale con Raggi X	TTRX
2. Microtomografia per l'Archeologia e la Paleoantropologia	SAPIENS
3. Tecniche Neutroniche per Archeologia e Analisi Forense	TNAAF
4. Basi Scientifiche e Tecnologiche della Meteo-Climatologia	METC
6. Storia della Fisica	
6-1. Elettrificazione e Illuminazione in Italia tra il XIX e XX Secolo	HISTEL
6-2. I Fisici Italiani tra Ricerca Scientifica e Impegno Civile	HISTSEN
6-3. Prosopografia della Fisica Italiana	HISTPRO
7. Attività Museali e Laboratori [*]	
PROGETTO STRATEGICO	LABVIEW

### In 2018 new LABVIEW Project

- Focusing on the realization of exhibition installations and demonstration workshops/labs for the Museum highly innovative from a technological point of view
- Starting from the experience of the exhibitions already successfully tested in Genoa and Bologna
   → even more emphasis on interactive aspects with the public, with more versatile solutions (greater use of projections instead of fixed panels)

There are already contacts with numerous Italian and foreign institutions for possible exchanges of materials and findings related to temporary thematic installations.

- The LABVIEW Project will also integrate the construction of demonstration laboratories
  ✓ for the EEE Project
  - ✓ the SAHF Project (Environment and Cultural heritage)
- In this way the Museum will be accompanied by a rich program for the public of experiments to be realized in laboratories that will be made available within the Centro Fermi

#### Grant or TD / project: at 1/3/2018

# MIUR notes about PTA [16 October 2017]

• RACCOMANDAZIONI ALL'ENTE

"Come proposto nel precedente anno, si raccomanda che le disponibilità finanziarie siano impegnate su progetti da sviluppare nel Centro, benché si ritenga importante la collaborazione con altri enti e università. Ciò soprattutto ora che è stata terminata la ristrutturazione della sede di via Panisperna, cosicché non solo possa funzionare come richiamo museale ma anche come centro in cui si svolgono le ricerche, cercando di differenziarle da quelle dell'INFN e INAF che già le supportano adeguatamente."

PIANO TRIENNALE DI ATTIVITÀ 2017-2018-2019 Executive Summary

Museo Storico delle Fisica e Centro Studi e Ricerche Enrico Fermi

Piano Triennale 2018-2020

Programmazione Progetti Interdisciplinari

Febbraio 2018

Thanks to Project Leaders for their contributions

#### Example from

Programmazione Progetti Interdisciplinari – 2018–2021

Extreme Energy Events (EEE)

Linea di Ricerca: Extreme Energy Events (EEE) - La Scienza nelle Scuole

#### Extreme Energy Events (EEE) – La Scienza nelle Scuole [EEE]

Responsabile: M. Abbrescia

#### Attività da svolgere nel prossimo triennio

Nei prossimi anni l'esperimento EEE proseguirà la presa dati, organizzando una serie di Run coordinati (uno per anno), con l'obiettivo di aumentare man mano la statistica accumulata e consentire la ricerca di fenomeni sempre più difficili da osservare. Particolare attenzione verrà posta nel mantenere le condizioni di presa dati le più stabili possibili, per esempio con l'installazione, ove possibile, di impianti di climatizzazione nei locali che ospitano i telescopi, in maniera da mantenere costante la temperatura ed eventualmente estendere la presa dati anche al periodo estivo.

#### Milestones:

- Proseguimento della presa dati: si intende effettuare il Run-5 con l'obiettivo di raccogliere almeno 30 miliardi di tracce candidate nel 2018
- Upgrade dell'elettronica: ci si propone di produrre e mettere in opera schede di trigger/GPS, nuove schede di front-end ed alimentatori HV controllati da remoto per equipaggiare altri venti telescopi
- Upgrade della rete di telescopi: ci si propone di far entrare in funzione almeno altre sette stazioni della rete, e di costruire al CERN camere sufficienti per altri per otto telescopi
- Proseguimento delle analisi: ci si propone di portare a compimento l'analisi relative alla ricerca di correlazioni a lunga distanza, e la simulazione accurata dell'apparato sperimentale con GEANT4

#### TO REMEMBER !

By the end of 2018 a report on the activity of each project will be requested.

Special attention to the % of achievement of the milestones

# FERMI Fermi Museum / Exhibition

Two important conferences and contacts in USA

 Within the exhibition "Enrico Fermi – The Pope of Physics ", Centro Fermi conference on "The lost notebook of Enrico Fermi – His first experiments with neutrons", 23<sup>rd</sup> October 2017 in Washington DC

# Fermi Museum / Exhibition

Two important conferences and contacts in USA

• Chicago University, 1-2 December 2017, to commemorate the first controlled, self-sustaining nuclear chain reaction, ushering in the Atomic Age.

#### NUCLEAR REACTIONS

1942: A Historic Breakthrough, an Uncertain Future

# CENTRO FERMI as an international cultural centre

- Fermi Museum to be included in the national / international network of Science Museums
- Fermi Museum to be included in the Roman Museums' circuit
- Centro Fermi to become an exclusive location for "scientific tourism": exhibitions, conferences, schools meetings, events ...
- Centro Fermi to become a Point of Presence (PoP) for learned societies and international organizations such as: EPS / SIF, APS, NuPECC, IPPOG, ECSITE, WFS ...
- Centro Fermi to become a major scientific cultural centre in Rome, in Italy, and worldwide
